

CVS Dead Weight Testers

The Dead Weight Tester is an extremely compact instrument designed for pressure testing and calibration.

The unit comes complete with weights, hand jack and hand set and one of each of 1/8", 1/4" and 1/2" adaptors. A metal carrying case is also supplied.

The CVS Dead Weight Tester has a guaranteed accuracy of 1/10 of 1 per cent of the rated pressure.

CVS Dead Weight Tester
