

CVS Controls Series 9000/9100 3 Piece Trunnion Ball Valves

The CVS Controls Series 9000/9100 Trunnion Ball Valves are available in a variety of configurations and materials to meet specific applications.

The CVS Series 9000/9100 Ball Valves are available in 2 Inch through 12 inch, ASME Class 150/300, 600, 900, 1500, and 2500, and both full and reduced port.

Standard features include:

- Emergency sealant injection (6" and larger)
- Anti-Blowout
- Lockout Protection
- Double Block and Bleed
- Valve Cavity Pressure Relief
- Manufactured to API 6D Specifications, NACE MRO175 and ASME B16.34-latest edition standards

Manufactured in compliance with
CSA Z245.15-17 Steel Valves

*Full Port Only

How To Order:

Model number identification CVS Series 9000/9100 Ball Valves. The CVS 9000 is a reduced port, while a CVS 9100 is a full port configuration.

Example: 6" F-10-7-R-2-S-N-V-4

The above model number represents a 6", Full Port, ASME Class 150, Trunnion, Raised Face End Connection, LCC Body Material, Carbon Steel Trim, Nylon Seats, Viton Seals, for NACE MRO175/ISO 15156 Service, and bare stem.

FLOW COEFFICIENTS

CVS Series 9000/9100 Trunnion Ball Valves

Cv is equal to volume of water @ 60°F in gallons per minute that will flow through an opening while producing a 1 psi pressure drop across the valve.

Flow Coefficient - Cv Rating						
Size (In.)	CL 150	CL 300	CL 600	CL 900	CL 1500	CL 2500
2X2	500	460	400	330	330	300
3X2	180	195	180	187	187	150

CVS 9000/9100 Repair Kits

When ordering replacement parts for the Series 9000/9100 Trunnion Ball Valve, please reference the model and serial number indicated on the nameplate. For more information contact a CVS Controls Sales Representative.

Ball Valve Stem Torques – In./lbs

To calculate stem torque at any pressure, use the formula located under the correct Class for the valve Port Size being used. ie: A 6" Class 600 at 1000psi, $2069 + (4.4 \times 1000) = 9104$ in. lbs.

Pressure and Temperature Limits:

Standard Materials Temperature Limits:

Nylon 6+(Molon): -50.8°F through 212°F (-46°C through 100°C)

Viton GLT: -54.4°F through 392°F (-48°C through 200°C)

Series 9000/9100 – 2 through 12 Inch Features

Stem Injection Fitting
provides secondary sealing

FEATURES

Emergency Sealant Injection

All 6 inch and larger CVS Trunnion Ball Valves come standard with a seat emergency sealant system. An emergency sealant system is available on 2 thru 4 inch valves upon request.

Blowout Proof Stems

Anti-Blowout protection is standard on all CVS Trunnion Ball Valves.

Composition Seal

Low pressure sealing is achieved by the capabilities of elastomers along with the strength and durability of hard plastics in the valve seats

Metal to Metal Seating

Certain corrosive and or erosive applications demand metal to metal seating. CVS utilizes various hard face materials on the ball and seat face to achieve metal to metal seating requirements.

Lockout Protection

All CVS Trunnion Ball Valves come standard with lockout protection. Both lever and gear operated ball valves are able to be easily lockout for safety and servicing.

Actuation

Pneumatic, hydraulic, and electric actuators are easily adaptable to CVS 9000/9100 Series Ball Valves. CVS Controls is able to supply and assemble the correct ball valve/actuator solution best suited for any application.

Double Block and Bleed – Series 9000/9100

All CVS Trunnion Ball Valves allow for block and bleed applications in the closed position only. For ball valves 6” and larger, in the closed position, the valve may be completely flushed under pressure.

Valve Cavity Pressure Relief

In the closed position a Trunnion Ball Valve will trap the process inside the body cavity. Certain conditions may cause expansion and contraction within. The CVS Trunnion Ball Valve is designed to self-relieve, which will allow the process in the body to escape to the installation.

Specifications/Certifications

All CVS Controls Ball Valves are manufactured in accordance of applicable standards.

API6A and API6D certifications are maintained and current.

All Series 9000/9100 ball valves conform to NACE MRO 175 design standards.

ABSA, The Pressure Equipment Safety Authority – CRN # OC01943.2

CVS Controls Ltd. is a certified and registered ISO 9001-2008 manufacturing facility. Our in house quality assurance program is dedicated to continually improve the efficiency and the effectiveness of our quality management system. Our product is confirmed by a rigid quality control program which utilizes the most up to date methods of testing and inspection.

Application and Design

CVS Controls in house engineering and application design can assist in finding the right solution best suited for your application.

Hydraulic or pneumatic actuation and Emergency Shut Down Devices (ESD) can be supplied and assembled to customer specifications. CVS Controls also has a wide variety of pressure pilots, limit switches, positioners as well as solenoid valves to complete the design package.

Contact a CVS Controls sales representative for more information.
