

CM Controls Series Floating Flanged Ball Valves

The CM Controls Floating Flanged Ball Valves are available in a variety of configurations and materials to meet specific applications.

The CM Controls Floating Flanged Ball Valves are available in 2 Inch through 4 inch, ASME Class 150/300 and 600, both full and regular port. A 2 inch reduced port ASME Class 900/1500 floating flanged ball valve design is also available.

Standard features include:

- Blowout Proof Stem
- Ball Position Indicator
- Tight Sealing
- Bi-Directional Design and Sealing
- Equalized Cavity Pressure
- Fire Safe Design
- Manufactured to API 6D Specifications, NACE MRO175 and ASME B16.34-latest edition standards

CM 3 Inch Class 600 Reduced Port

CM 3 Inch Class 600

ABSA CRN# 0C21698.2

SPECIFICATIONS

CM Controls Floating Flanged Ball Valve Product Range Full and Reduced Port, Flanged End Connection

Body Material	Class	Port	Valve Size (inches)						
			1	1.5	2	3	4	6	8
Carbon Steel and Stainless Steel	150	Reduced	X	X	X	X	X	X	
		Full	X	X	X	X	X	X	
	300	Reduced	X	X	X	X	X	X	
		Full	X	X	X	X	X		
	600	Reduced			X	X	X		
		Full	X	X	X	X	X		
	900/1500	Full	X	X	X	-	-		
	2500	Full	X						

How To Order:

Model number identification CM Controls Floating Flanged Ball Valves

Standard materials configuration is: LF2 Body, PTFE Seat, Viton Seal: for Class 150 and Class 300

Class 600 through 2500 standard material is: LF2 Body, Nylon Seat, Viton Seal

3"	R	30	1	R	2	S	N	F	4			
Valve Size	Port Config.	Pressure Class	Design	End Connection	Body Material	Trim Material	Seat Material	Seal Material	End Connection	Drive Type		
Inch	R Reduced	10 150	1 Floating	R RF	Blank A105	E ENP	P PTFE	F PTFE	1 Female Thread	Blank Manual		
		30 300			1 LF2		N Nylon	N Nylon	2 FNPT			
				60 600			J RTJ	2 LCC	V Viton		V Viton	4 Flange End
		F Full			N NPT				3 SSt		S Stainless Steel	S Stainless Steel
	M Molon					M FFKM						
	D Devlon											

*2 Inch Class 1500 only available in reduced port

FLOW COEFFICIENTS

CM Controls Floating Flanged Ball Valves

The flow coefficients (Cv) factor for CM Controls Floating Flanged Ball Valves are to be used for reference to correctly size valve for desired applications. Cv is equal to volume of water @ 60°F in gallons per minute that will flow through an opening while producing a 1 psi pressure drop across the valve.

Flow Coefficients - Cv							
Series	Class	Valve Size					
		1	2	3	4	6	8
Reduced Port	150		105	200	600	800	2150
	300		105	200	600	800	2150
	600		100	200	600	790	
	1500		85	180			
Full Port	150	95	420	1200	2200	5150	9500
	300	95	420	1050	2100	5100	9400
	600	64	400	1000	1850		
	1500	55	330				

* Includes all ASME Class Valves in the series.

CM Controls Repair Kits

When ordering replacement parts for the Floating Flanged Ball Valve, please reference the model and serial number indicated on the nameplate. For more information contact a CM Controls Sales Representative.

Pressure/Temperature Ratings – Material Selection

CM Series 8000/8100 Floating Flanged Ball Valves come standard with PTFE seat materials, and Viton seal materials. Additional materials may be available upon request, contact a CM Controls representative for more information.

Material	Low Temperature Capabilities
RPTFE	-40°C (-40F)
Devlon	-53°C (-63.4F)
Peek	-60°C (-76F)
Nylon	-21°C (-5.8F)

*Pressure and temperature limits determined by class and body material selection

FEATURES

Blowout Proof Stems

Anti-Blowout protection is standard on all CM Floating Flanged Ball Valves.

Ball Position Indicator

Ball position is easily determined and identified in either full open or full close position.

Lockout Protection

All CM Floating Flanged Ball Valves come standard with lockout protection.

Actuation

Pneumatic, hydraulic, and electric actuators are easily adaptable to CM 8000/8100 Series Ball Valves. CM Controls is able to supply and assemble the correct ball valve/actuator solution best suited for any application.

Bi-Directional Sealing

CM Floating Flanged Ball Valves may be installed in either direction, without compromising the integrity of the seal.

Equal Cavity Pressure

Both line pressure and the ball valve cavity pressure is maintained equally while the valve is in the open position.

Bubble Tight Seal

Downstream process flow is cut off by upstream pressure pushing against the ball in the closed position.

Firesafe ISO Design

All CM Floating Flanged Ball Valves have been proven to meet Firesafe API607 or API 6FA Design Standards.

Specifications/Certifications

All CM Controls Ball Valves are manufactured in accordance of applicable standards.

API6D certifications are maintained and current.

All CM Floating Flanged Ball Valves conform to NACE MRO 175 design standards.

ABSA, The Pressure Equipment Safety Authority - CRN # 0C21698.2

CM Controls Ltd. is a certified and registered ISO 9001-2015 manufacturing facility. Our in house quality assurance program is dedicated to continually improve the efficiency and the effectiveness of our quality management system. Our product is confirmed by a rigid quality control program which utilizes the most up to date methods of testing and inspection.

Application and Design

CM Controls in house engineering and application design can assist in finding the right solution best suited for your application.

Hydraulic or pneumatic actuation and Emergency Shut Down Devices (ESD) can be supplied and assembled to customer specifications. CM Controls also has a wide variety of pressure pilots, limit switches, positioners as well as solenoid valves to complete the design package.

Contact a CM Controls sales representative for more information.
